Professional Summary

Highly skilled Full Stack Developer with 8+ years of experience in web development across Finance, E-commerce, and iGaming sectors. Proven ability to design, develop, and maintain responsive, high-performance web applications using React, Node.js, and MongoDB. Strong experience in Agile environments, with a passion for innovation and delivering impactful solutions.

Core Competencies

- Web Development: React, Next.js, Express, HTML5, CSS3, JavaScript (ES5/ES6)
- Database Management: MongoDB, PostgreSQL
- Agile Methodologies: Scrum, Kanban
- Version Control: Git
- API Development: REST API
- Bachelor's Degree in Information Technology

Working Experience

- Senior Software Engineer | Arch Global Services, Inc. | February 2025 - Present
 - Engineered and deployed scripts for MongoDB to maintain a high level of data quality by resolving inconsistencies and updating client policy data.
 - Engineered and deployed internal automation tools that eliminated repetitive manual effort in managing and updating client insurance policies.
- Senior Software Developer | CoreX Studio | July 2022 – February 2025
 - Led a critical initiative to enhance platform scalability for 10,000+ concurrent users, boosting site performance by 20%.
 - Optimized React and Next.js architecture, cutting page load times by 15% and reducing server load by 25%.
 - Delivered a faster, more robust, and highly available user experience for a high-traffic online casino platform.
- Front-end Developer | BrightStores, Inc. | October 2020 – July 2022
 - Developed a flagship e-commerce theme that cut new project development time by 30% and was adopted across 50+ client stores.
 - Drove higher client retention by delivering high-quality custom solutions and maintaining 99.9% system uptime.
 - Spearheaded the migration of company websites to Next.js, significantly improving SEO performance and core web vitals.
- IT Associate | SM Retail, Inc. | October 2019 – September 2020
 - Successfully developed and shipped two full-stack applications from concept to production for internal enterprise use.

- Built a critical Item Management System with React and Apollo GraphQL to manage inventory and SKUs at scale.
 - Leveraged AWS Lambda and CloudWatch to deploy efficient, monitored, and robust serverless solutions.
- Programmer Analyst | Metrobank (Agency: WeSupport, Inc.) | December 2018 – September 2019
 - Developed a secure wealth management application using React and Redux for high-net-worth clients to manage complex investment portfolios.
 - Constructed foundational User Management and API Gateway microservices using [Loopback.io](https://loopback.io).
 - Delivered a scalable and maintainable backend architecture to power new financial technology applications.
- Software Engineer | Medilink Network, Inc. | June 2017 – September 2018
 - Engineered over 30 REST API endpoints to power critical single-page applications in the healthcare sector.
 - Accelerated team growth and productivity by successfully mentoring and training over 10 new engineers.
